

Quality and Product Safety Policy

To become an exemplary organization in our industry without any compromise on Occupational Safety and Health, we have adopted the following objectives;

- Produce high-quality products that comply with human health and food safety,
- Meet customer needs and outcomes with comprehensive solutions,
- Be a preferred workplace for our employees,
- Ensure the continued availability of all our products, technologies, and products,
- In line with our sustainability policies, based on climate, circularity, and human-focused principles, we aimed to work.

To achieve this aim:

- As management, we are committed to improving product safety and quality culture, providing the necessary resources to ensure its adoption among all users.
- We adapt relevant laws, regulations, and management system systems.
- We provide a confidential and transparent communication environment to quickly report any risks, errors, or non-conformities related to product safety.
- We actively present product safety and quality options to all our employees.
- We operate with a customer focus and ensure consistent customer performance.
- We encourage continuous improvement among our employees, suppliers, and all our employees.
- We conduct activities to develop products that comply with human health and food safety.
- We define measurable goals, regularly monitor, and evaluate the achievement of these goals.
- We organize our workloads with preventive and risk-based strategies, increasing efficiency while maintaining quality.
